PROFESSIONAL SUMMARY

ISTQB-certified (CTFL) **QA Automation Engineer** with **4 years** of experience in **manual and automation testing** of Web, Mobile (Android & iOS), Enterprise (CRM, CPQ, ERP), E-commerce and **AI/LLM-driven applications**. Hands-on in building scalable **test automation frameworks** using **Selenium WebDriver, Appium, Java, TestNG and Maven** with **Page Object Model (POM)** and **data-driven** design. Strong in **API testing** (REST Assured, Postman), **CI/CD integration with Jenkins and Azure DevOps**, **database testing with SQL**, and **cross-platform mobile automation** on LambdaTest real device cloud. Experienced in **Generative AI / LLM output validation** and hallucination detection. Well-versed in **STLC, SDLC, Agile/Scrum**, test planning, defect life cycle management (Jira, Redmine) and mentoring junior QA engineers. Pursuing an MBA in IT Management.

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, Appium, TestNG, Maven, Page Object Model (POM), Data-Driven Framework, UiAutomator2, XCUITest

Programming & DB: Java (OOP), SQL, Database Testing, Backend Data Validation

API Testing: REST Assured, Postman, RESTful Web Services, API Automation, Backend Integration Testing

CI/CD & Cloud: Jenkins, Azure DevOps (CI/CD Pipelines), Continuous Integration, LambdaTest Real Device Cloud, Build Verification Testing

Testing Types: Functional, Regression, Smoke, Sanity, Integration, End-to-End (E2E), Usability, Compatibility, Cross-Platform, Mobile App Testing

AI / GenAI Testing: LLM Output Validation, Generative AI Testing, Hallucination Detection, Accuracy & Relevance Evaluation

Process & Tools: STLC, SDLC, Agile/Scrum, Test Planning, Test Case Design, Requirement Analysis, Defect Life Cycle, Jira, Redmine

Domains: E-commerce (Salesforce Commerce Cloud), CRM / CPQ / ERP, Healthcare AI, HRMS, Warranty Management

WORK EXPERIENCE

QA Automation Engineer — Mobiuso India Technologies Pvt. Ltd. *Jan 2024 – Present*

- Own end-to-end QA for **Web, Android, iOS, enterprise and AI applications** across 6 client projects.
- Build and maintain **Selenium, Appium, Java, TestNG** automation frameworks using **POM** and **data-driven** design.
- Automate **REST API testing** with **REST Assured** and **Postman** to validate backend integrations.
- Integrate automation suites with **Jenkins** and **Azure DevOps CI/CD pipelines** for automated build validation.
- Run **cross-platform mobile automation** on **LambdaTest** real devices for OS and device compatibility.
- Validate **LLM / GenAI outputs** for accuracy, relevance and **hallucination detection**.
- Perform **SQL** data validation and manage the **defect life cycle** in **Jira / Redmine**.
- Mentor junior QA engineers and contribute to **Agile/Scrum** ceremonies.

QA Engineer — OTFCoder *Sep 2023 – Dec 2023*

- Executed **100+ functional and regression test cases** for a Warranty Management System.
- Logged **25+ critical defects** before production release, improving stability.
- Automated **API validation with REST Assured** for faster, reliable build checks.
- Cut **defect turnaround time by 20%** through close collaboration with developers.
- Recommended **UI/UX improvements** that reduced production issues.

QA Engineer — Astound Commerce *Sep 2022 – Sep 2023*

- Tested **Salesforce Commerce Cloud (SFCC)** storefronts for apparel and beauty brands.
- Validated **catalogs, checkout, pricing, payment gateways** and promotions.
- Executed **regression testing** for major and seasonal releases.
- Tracked and resolved **live production issues** for stable deployments.
- Collaborated with cross-functional teams in **Agile** sprints.

KEY PROJECTS

CRM / CPQ / ERP System — VitalEdge *24 Months*

Tech: Selenium, Java, TestNG, POM, REST Assured

- Developed and maintained **Selenium + Java** automation scripts using **POM**; designed a scalable **data-driven framework**.
- Validated complex **pricing calculations and CPQ workflows**; performed **API testing** for backend integrations and data integrity.

HR & Internal Systems — BlueStar *18 Months*

Tech: Jira, Postman, Agile

- Designed and executed **400+ test cases** covering functional, regression, smoke and usability testing.
- Performed **API testing and end-to-end validation** across multiple systems; tracked defects in **Jira**.
- Contributed to requirement analysis, **test planning** and sprint ceremonies supporting continuous delivery.

Enterprise Configurator System — NWN Configurator *12 Months*

Tech: SQL, Regression Testing

- Led the **end-to-end QA lifecycle** as the **sole QA**: authored test plans and executed extensive regression suites.
- Performed **backend data validation using SQL**; worked with developers and clients to clarify requirements.

AI-Based Medical Knowledge Platform *12 Months*

Tech: LLM Testing, Web & Mobile, API

- Validated **LLM-generated responses** for accuracy, contextual relevance and **hallucination detection**.
- Performed functional, regression and **API testing** across web and mobile; trained junior QA on AI testing workflows.

Salesforce Commerce Cloud E-Commerce Platform — Astound *11 Months*

Tech: SFCC, Business Manager

- Validated checkout, payment gateways, promotions and dynamic pricing; managed catalogs via **Salesforce Business Manager**.
- Executed seasonal-release regression testing and resolved live production issues to minimise downtime.

eInspection Plus Mobile App — VitalEdge *4 Months*

Tech: Appium, LambdaTest, UiAutomator2, XCUITest

- Built and maintained **Appium** automation for **Android and iOS**, executed on **LambdaTest** real device cloud.
- Ensured **device and OS compatibility** through extensive cross-platform automated testing.

MBA RESEARCH PROJECT

A Study on Agentic AI Adoption and Its Impact on IT Service Management (ITSM) *Amity Online – Minor Project*

Focus: Agentic AI, AI Agents, AIOps, ITIL, ITSM, Enterprise Automation, AI Governance

- Analysed **agentic AI adoption** across incident, service request, problem, change and knowledge management using secondary data.
- Assessed **AI governance, security and human-in-the-loop** risks; proposed a **phased adoption framework** with KPIs (MTTR), least-privilege access and agent observability.

CERTIFICATIONS

- **ISTQB Certified Tester – Foundation Level (CTFL)**
- Learn Selenium with Java: From Basics to Advanced | Mobile Automation with Appium (Udemy)
- API Automation (Coursera) | Certificate Course in Database Programming
- Anthropic AI Fluency: Framework and Foundations

EDUCATION

MBA / PGDM – Information Technology Management, Amity Online University *2027 (Pursuing) | 9.2/10*

B.Tech – Computer Science and Engineering, Marwadi University, Rajkot *2023 | 8.43/10*

Diploma (12th equivalent) *2019 | 80%*

10th, CBSE *2016 | 72%*
